Westalee Design was formed in 2007 and began with the first Adjustable Rulers with Locking Fabric Guide for Piecing and Templates for Quilting.

On January 1st 2015 we introduced the first Quilting System of its kind our unique Ruler Foot and Quilting Templates for domestic sewing machines.

Leonie West won the New Inventors peoples Choice Award Best Invention for the Adjustable Rulers in 2008 and the Australian Best Product of the Year in 2015 for the Westalee Design Quilting System

The popularity of the Westalee Design products has continued to help grow our business each year. We are a leading Manufacturer of high quality, accurate patchwork and quilting rulers, templates and guides that also include an extensive range of long-arm quilting tools and custom-made tools. All of our products are proudly designed by Leonie in Australia, and are manufactured in Australia.

We, as a distributor, are very proud to carry this wonderful range. Feel free to contact us for any information on Westalee products.

# Leonie West

Award Winning Inventor, Quilter and the Creative Genius behind Westalee Design

Leonie has over 37 years of experience in quilting and over 10 years designing and selling rulers and patchwork tools. For the last 4 years, Leonie has been sharing her knowledge with demonstrations and workshops all around the world, as well as online. All Westalee Design Accredited Teachers are accredited by Leonie West.

It is important to Westalee Design that students who attend a Westalee Design Class with a Westalee Design Accredited Teacher have an enjoyable day or days and leave with the confidence to go home and continue quilting with Westalee Design Rulers and Templates.

# Anke de Haan

Westalee Design Gold Accredited Teacher at Rinske Stevens Design

'I started with patchwork in 1994. In 1995 I started teaching. First by hand, during that time I used the sewing machine more and more. From 2015 I have designed patchwork patterns for Rinske Stevens Design.

In August 2015 I found the Westalee website with beautiful rulers for quilting. I did order and it was wonderful to work with. I learned how to work with the sampler set from the Youtube films by Leonie and then The Quilt Class in a Bag. The last one did give me inspiration how to use the rulers in a different way and

think: what would happen if I turn it or move it?

Since Rinske has been importing the Westalee Design Rulers, I give demos and teach the shop owners and their teachers to promote the rulers here in the Netherlands and Europe.

And then the honour of being an accredited teacher of Westalee in August 2018. That was really very special for me.

# Which Ruler foot do you need?

To determine the shank size of your sewing machine, all you need to do is lower your foot and then measure the height of the center of the hole for the screw from the needle plate. We offer 4 different 1/2" Foot styles and 2 different thicknesses of templates for Domestic machines based on shank height. The "1/2" refers to the diameter of the foot. This results in a stitch line that is always 1/4" from the needle. Machines not listed? Use the size test to the right, or call to confirm.

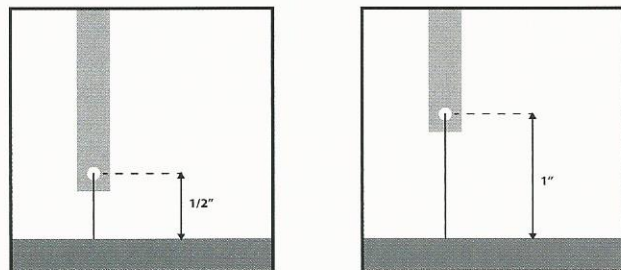

## Important!

If your machine is not listed, you'll need a Low Shank Ruler Foot.

The Decorative Thread Ruler Foot is available for all machines listed above, except machines requiring a High Shank Special Foot!

For the High Shank Foot and High Shank Special Foot you will need the High Shank Templates.

For the Medium Shank Foot and the Low Shank Foot you will need the Low Shank Templates.

4.5mm High Shank Templates for HS & HHS Feet

3mm (1/8") Low Shank Templates for LS & MS Feet

## Different Sewing Machines

# Ruler Feet

Westalee Design, the creators of the original one piece Ruler Foot for most domestic sewing machines, gives you the choice from:

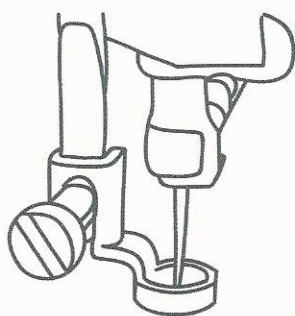

## Best Selling

Westalee Design Starter Set: Ruler Foot, stable tape and 12" Arc Template

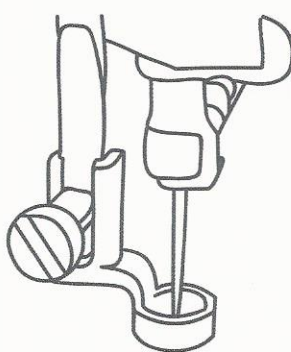

or

A single Westalee Design Ruler Foot, for those who use more than one sewing machine.

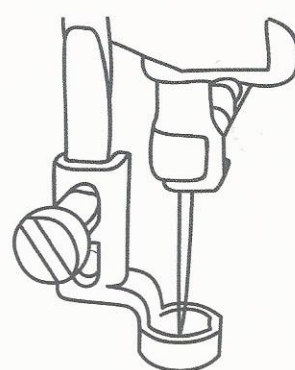

## The Westalee Design Decorative Thread Ruler Foot

**Low Shank**  
WDTRF-LS

**Medium Shank**  
WDTRF-MS

**High Shank**  
WDTRF-HS

Continuing in our tradition of innovation for quilting, we brought you the first Decorative Thread Ruler Foot to let you couch with just one Ruler Foot along with the guidance of templates. Use a wide variety of decorative threads from stranded silks to 12 ply wools and metallics and without changing

the Ruler Foot, you will be able to create beautiful features in your designs using the accuracy provided by using any of our templates.

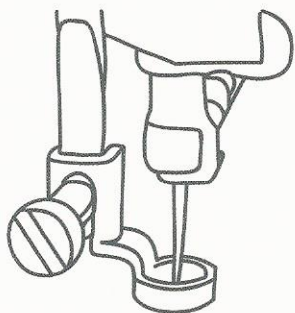

The Decorative Threads Ruler Foot is Design Registered in Australia and the USA.

# Domestic Ruler Foot

The Westalee Design Starter Set is the best way to start quilting with Templates. It contains a Ruler Foot, a strip of Stable Tape and a 12" Arc Template. The 12" Arc is one of the most useful Templates that we make, it is the go to Template for many of our quilters.

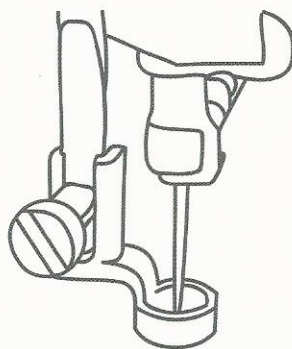

The domestic ruler foot is also available by itself.

# Crosshair Rulers

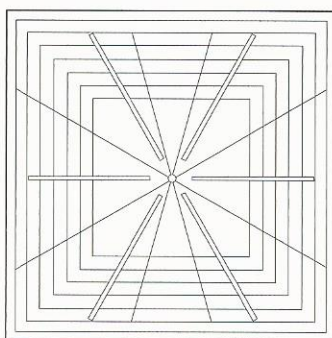

'This is one of those Tools that I consider to be an essential when I am quilting. When I am quilting designs that are based on a repetition such as Wreaths, Spin-e-fex and Spinning Wheels, if I am quilting an 8 Point design I want 8 even sections. Whether quilting on a domestic machine or a longarm machine I like to mark reference lines on my quilts. Reference lines give me a much better result. If I am using rotating templates, reference lines will give much more accurate spacing. On a domestic machine the quilt is not taught as on a longarm machine and there is movement of the quilt sandwich which can make it difficult to use the rotating lines on the templates. So I mark in the reference lines. I like using our Cross Hair Ruler to locate the centre and mark 4, 8, 16 and 32 lines if required.' Leonie

# Spin e-fex

Spin-e-fex was launched in January 2012 and the range has been growing ever since. Spin-e-fex uses our unique Westalee Design Key System. The Key System makes it possible to stitch around the inside of a template without the need to cut the threads, to enter or exit the template and leaves no unsightly flat line when stitching past an open gate entrance. Each of the Spin-e-fex sets consist of 5 templates for the chosen shape, in 5 sizes (3.5", 5.5", 7.5", 9.5" and 11.5"). For each Spin-e-fex shape, individual templates are available.

# Circles on Quilts

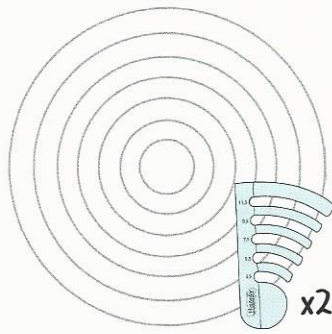

Circles on Quilts Templates are used for quilting concentric circles. These templates allow you to quilt circles at 1/4" increments from 12" - 18". Can be used to make baptist fans. Using our single pin system, there is only 1 point of rotation, which reduces stitch misalignment. For use with domestic machines.

# Spinning Wheels

Circles On Quilts Spinning Wheels create continuous circular patterns. Using a single pin, there is only 1 point of rotation, which reduces the chance of misaligned stitches. The etched markings are easy to see: Westalee Design's unique key gate allows you to place the ruler foot inside the template and then close the opening. This reduces how often you must cut your threads, and does not leave you with a bump in the stitching where you stitched past the opening.

### How to use a Spinning Wheel Template

Start at A, sew to B, sew to C and then back to A. Rotate the template (allow the template to move the ruler foot, switch the center circle) align the switching with the guideline. Repeat.
